

catalog no.	7235	7235-02	7236
description	scuba-vest life jacket	detonator	co ₂ cartridges, pkg. of 6
color	black/orange		
price	9.95	3.00	3.00

Designed by Jim Christiansen, one of America's foremost advocates of diving safety. Made of specially prepared material, the inside of which is completely saturated with a specially compounded leak-proof and corrosion proof heavy coating. The Scuba-Vest is engineered to float an unconscious or resting diver in a "face up" position. Experience has shown that although the Scuba-Vest is primarily a safety device it can be utilized for that "long swim back to the boat." The Scuba-Vest is reversible. One side is professional black. The other side is officially approved International Orange, the most vivid of colors for diving safety. In an emergency, a diver wearing the black side out can easily reverse the Scuba-Vest to show the orange side for easy identification. The Scuba-Vest is inflated by means of a "squeeze-grip" detonator containing an oversized, cadmium plated CO₂ cartridge. The re-usable detonator can be easily removed, without the aid of tools and a new CO₂ cartridge installed, ready for instant re-use.
